ODPRAVA V JUŽNO STENO Lotseja (1981)

Muzejska razstava ob 40. obletnici odprave

Medinstitucionalna razstava *Odprava Lotse 1981: južna stena* je nastala kot plod sodelovanja med alpinisti – člani odprave, muzeji, ki hranijo z odpravo povezano gradivo. Tako so oživele fotografije in zasijali predmeti kot sled dosežka, ki se je zgodil mnogo prej, kot je bilo pričakovano. Veličastna južna stena osemtisočaka Lotse je bila preplezana.

»Padel je tabu.«

The Lhotse South Face Expedition (1981)

Museum exhibition marking the 40th anniversary of the expedition

The inter-institutional exhibition *The Lhotse 1981 South Face Expedition* is the result of the cooperation between climbers – members of the expedition and museums that hold material related to the expedition. This allowed photographs to come to life and objects to shine as reminders of an achievement that was reached much sooner than had been expected. The mighty south face of the eight-thousander Lhotse was climbed.

“A taboo has been conquered”.
